

Thermal Technology

Standard Oil/Air Heat Exchangers

Our plate and bar cooler technology combines standard modules to proven system in many different applications. A vast range of mobile and stationary, standard and customized projects have been successfully integrated at our worldwide operating customers.

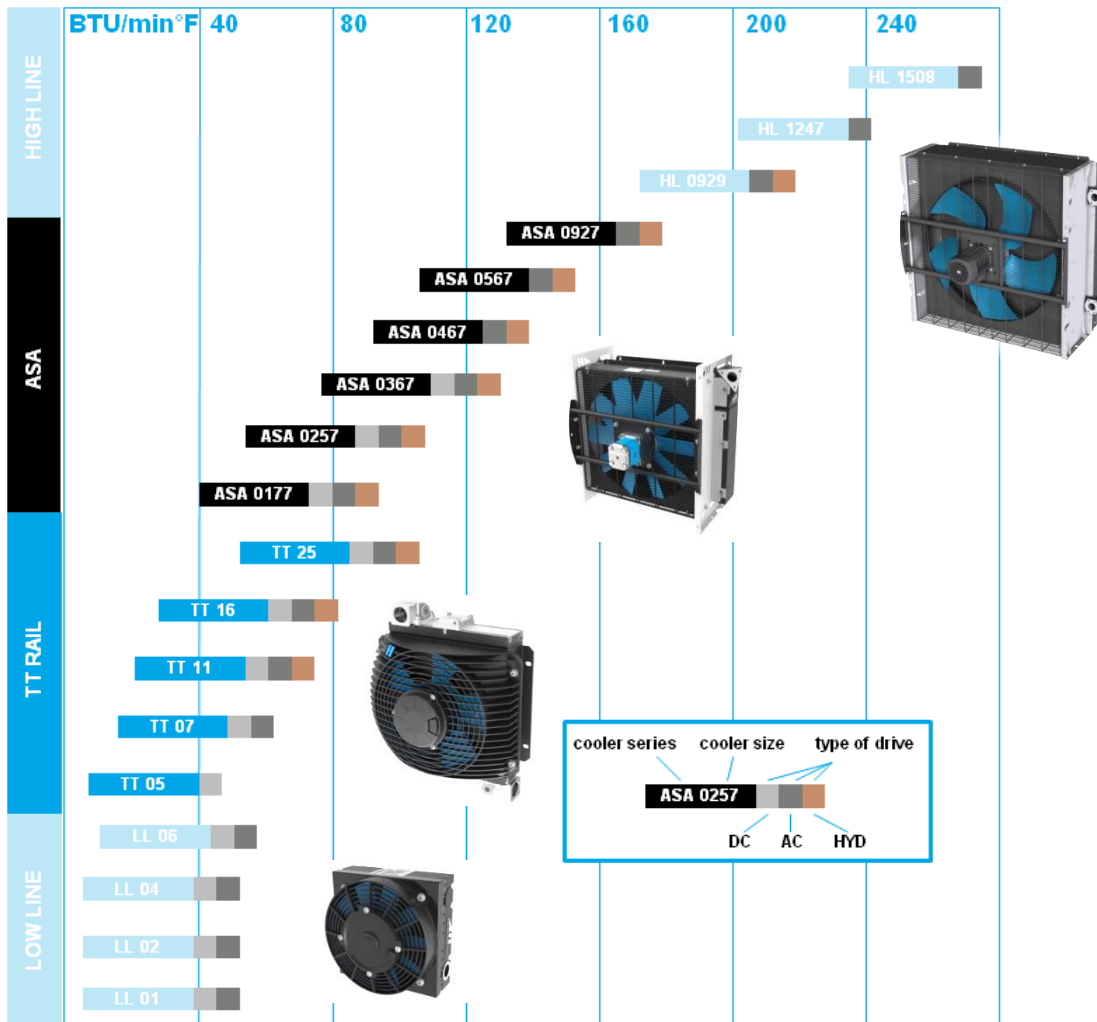

Beyond our capabilities regarding engineering, projecting, lead time and cost efficient availability, we offer solutions for cooling a wide range of fluids.

- thermal / pressure bypass
- 5-10 days availability
- high performance design
- made in the USA
- 370 PSI static pressure

Just let us know how we could support you on a project!

Standard Cooler Series

Our standard oil/air cooler series serve for best fit into installation space. With our patented connection systems and various accessories we achieve the best of two worlds: a customized configured product for your application, with the benefits of a standard product like short lead time, cost efficient availability and high quality! Check out the overview below and use the details on the data sheets and accessories.
